

Melaju is a partnership between the Governments of the UK and Indonesia to promote sustainable infrastructure development aligned with Indonesia’s vision for 2045 Golden Indonesia and targets to meet net zero emissions by 2060 or sooner.

Led by the British Embassy in Jakarta, Melaju engages national and subnational governments, development partners, industry expertise, and local communities to support the development of green, modern cities, with accessible, safe and sustainable infrastructure and public transport.

MELAJU WORKS ACROSS 4 PILLARS

- 01 Policy development**
Strengthening regulatory frameworks and increasing capacity and capability.
- 02 Project development and delivery**
Building institutional capacity for high-quality project preparation and implementation.
- 03 Finance and investment mobilisation**
Attracting investment and ensuring financial viability for green infrastructure projects.
- 04 Collaboration**
Promote partnerships and knowledge-sharing among stakeholders.

UK PROGRAMMES

- Future Cities Infrastructure Programme**
Preparation and finance support for infrastructure projects that are 'green' or has the potential to be.
- Green Cities, Infrastructure and Energy Programme**
Technical assistance to develop climate-resilient economic infrastructure.
- UK PACT (Partnering for Accelerated Climate Transitions)**
Partnering to support emissions reductions across the transport sector.
- Climate Finance Accelerator**
Linking project developers, financiers and policymakers to unlock funding for low-carbon projects.
- ASEAN Catalytic Green Finance Facility**
Technical assistance and access to over \$1 billion in loans (across ASEAN members) from co-financing partners for green infrastructure projects.
